Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claim 4 is objected to because of the following informalities: "s 4" (line 2) should be - -
4 - -. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Oka'254 et al.

The Oka et al. reference discloses a toner container 6 comprising first and second shutter members (4,5) that are arranged in an overlapping fashion and urged from an open to a closed position by motor 23.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Oka'254 et al. in view of Miller'607 et al.

Art Unit: 3751

The Oka et al. reference discloses a toner container (supra), but does not explicitly disclose sealing members associated with the shutter members. The Miller et al. reference discloses another toner container having explicit sealing members (20,22) to prevent accidental spilling (see col. 3, lines 45-51). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the Oka et al. device to utilize sealing members in view of the teachings of the Miller et al. reference to prevent accidental spillage.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Weed and Miller references pertain to toner containers with associated shutters, and the Bowen and Lonardi et al. references pertain to valve arrangements utilizing plural shutters.

Claims 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
